

Swanage Pier Tide Gauge

Location

OS: 403692E 78849N

WGS84: *Latitude: 50° 36.5598' N Longitude: 01° 56.9510' W*

Seaward end of Swanage Pier

Instrument Type

Rosemount WaveRadar REX

TGZ

Benchmarks

Benchmark

TGBM = 6.262m above Ordnance Datum Newlyn

TGZ = 6.337m above Ordnance Datum Newlyn

TGZ = 7.737m above Chart Datum

TGZ = 0.075m above TGBM

Description

Top of S/S horizontal frame

Datum

All data are to Ordnance Datum Newlyn. The height of Chart Datum relative to Ordnance Datum at Swanage is -1.40m (Admiralty Tide Tables, Supplementary Table III).

Survey information

The site was surveyed on 29 May 2008.

Site characteristics

The Pier is on open coast with no nearby estuaries, but leeward of a headland. Spring tidal range is approx. 1.1m.

Data Quality

Recovery rate (%)	Sample interval
96	10 minutes

Service history

The radar was deployed on 07 March 2007. No re-calibration of the instrument is required.

Measurements

Residuals and Elevations (OD and CD) for the whole year are shown in Figures 1 to 3 respectively. It should be noted that, given the small tidal range and double High Waters, tidal predictions are particularly difficult at this site, both for elevation and especially for timing. Accordingly, there may be instances of apparent tidal surge and/or periodicity in the surge which are, in reality, an artefact of the predictions.

General

The time series of 10 minute tidal elevations for one year is quality-checked in accordance with ESEAS guidelines, flagged and archived. The archived time series is continuous and monotonic, with missing data given as 9999. The missing data shown are days where the entire 24 hours of data are missing.

Monthly [extreme maxima/minima](#) are the maximum and minimum water levels from all measured data for that month. Monthly [surge maxima/minima](#) (residuals) are calculated in a similar manner from the time series of residuals. Residuals are derived as the measured tidal elevation minus the predicted tidal elevation.

The monthly Mean Level is calculated as the average of all readings for the given month. The annual Z₀ is the value of Mean Sea Level derived by the harmonic analysis of the year's data. These values should not be used for any purpose without consideration of the recovery rate.

Acknowledgement

Tidal predictions and levels were produced by EMU Limited. The REX is installed on Swanage Pier by kind permission of Swanage Pier Trust.
