

Lymington Tide Gauge

Location

OS: 434874E 93526N

WGS84:Latitude: 50° 44' 25.0638'' N Longitude: 01° 30' 25.6398'' W

On the Royal Lymington Yacht Club Starting Platform

Instrument Type

Etrometa Step Gauge

Benchmarks

Benchmark

TGBM = 3.919m above Ordnance Datum Newlyn

TGZ = -2.217m above Ordnance Datum Newlyn

TGZ = -0.24m above Chart Datum

TGZ = 6.136m below TGBM

Description

Top of stepgauge frame

Datum

All data are to Ordnance Datum Newlyn. The height of Chart Datum relative to Ordnance Datum at Lymington is -1.98m (Admiralty Tide Tables, Supplementary Table III).

Survey information

The site was surveyed on 20 December 2007.

Site characteristics

The Royal Lymington Yacht Club Starting Platform is approx. 1.7km offshore, in the Western Solent. Spring tidal range is 2.1m.

Data Quality

Recovery rate (%)	Sample interval
76	10 minutes

Service history

The stepgauge became operational on 19 April 2007. The lower section of the gauge required replacement during the winter of 2015. The gauge was last serviced in October 2015. No recalibration of the instrument is required.

Measurements

Residuals and Elevations (OD and CD) for the whole year are shown in Figures 1 to 3 respectively. It should be noted that, given the small tidal range and double High Waters, tidal predictions are particularly difficult at this site, both for elevation and especially for timing. Accordingly, there may be instances of apparent tidal surge and/or a periodicity in the surge which are, in reality, an artefact of the predictions.

2015	1.52 (0.37)	25-Dec-2015 10:00	0.65	17-Nov-2015 01:10	-	76%

* Note that tidal elevations prior to August 2007 were derived using a different instrument; the elevations are thought to be reasonably reliable but timing issues prevented production of residuals

Tidal levels		
Observation period	August 2008 to December 2012	
Tide Level	Elevation (OD)	Elevation (CD)
HAT	1.34	3.32
MHWS	1.19	3.17
MHWN	0.69	2.67
MSL	0.12	2.10
MLWN	-0.46	1.52
MLWS	-0.95	1.03
LAT	-1.99	-0.01

General

The time series of 10 minute tidal elevations for one year is quality-checked in accordance with ESEAS guidelines, flagged and archived. The archived time series is continuous and monotonic, with missing data given as 9999. The missing data shown are days where the entire 24 hours of data are missing.

Monthly [extreme maxima/minima](#) are the maximum and minimum water levels from all measured data for that month. Monthly [surge maxima/minima](#) (residuals) are calculated in a similar manner from the time series of residuals. Residuals are derived as the measured tidal elevation minus the predicted tidal elevation.

The monthly Mean Level is calculated as the average of all readings for the given month. The annual Z_0 is the value of Mean Sea Level derived by the harmonic analysis of the year's data. These values should not be used for any purpose without consideration of the recovery rate.

Acknowledgements

Tidal predictions and levels were produced by Fugro EMU Limited. The step gauge is mounted on their Starting Platform by kind permission of the Royal Lymington Yacht Club.
