

SMP Policy Unit: 4d-MU3

Survey Unit: 4dSU22

Pagham to West Bognor Regis

Topographic Beach Profiles 4d01357A – 4d01379

Summary

The Pagham to West Bognor Regis frontage is a relatively sheltered southeast facing stretch, backed by residential properties. Although no retaining structures are in place in this Unit, the shingle berm maintains a width of up to 40m along the eastern two-thirds of the Unit, its stability reflected by the presence of relatively dense undisturbed shingle vegetation.

Survey Regime

Survey type	Frequency	Survey extent
<i>Topographic baseline</i>	5 years	MLWN
